Vehicle Recovery Gear

# Wild Dog 4x4® Synthetic Winch Line

## Wild Dog 4x4® Synthetic Winch Line

### Lightweight.

Wild Dog 4x4® Synthetic Winch Line is 80% lighter than wire cable.

### Safe.

In the event of breakage, Wild Dog 4x4® Synthetic Winch Line snapback or whiplash is not as dangerous as a wire cable.

Wild Dog 4x4® Synthetic winch Line will not splinter and tear up your hands.

### Strong.

Wild Dog 4x4® Synthetic Winch Line has a higher breaking strength than wire cable giving you that added peace of mind when dependability is critical.

### Float.

Wild Dog 4x4® Synthetic Winch Line floats in water, an added benefit for visibility and safety.

### Convenient.

Wild Dog 4x4® Synthetic Winch Lines are torque free and will not kink like wire cable.

### Winch Retainer.

### Easy Install.

Wild Dog 4x4® Synthetic Winch Line comes complete with a crimped terminal end and bolt for easy installation to the winch drum.

### Colour.

Safety Orange, Fibres has been dyed before the rope was manufactured. This means that the rope will not fade like others.

# Wild Dog 4x4® Heavy Duty Recovery Straps

## Wild Dog 4x4® Heavy Duty Recovery Straps with 250mm soft eye on each end.

### FEATURES:

- High strength-to-weight ratio
- Lightweight and flexible to reduce the risk of injuries
- Low elongation
- Minimal recoil at break
- High tenacity polyester covers to reduce the ingress of grit
- High abrasion resistance
- Protected 250mm soft eye splice terminations
- Certified Tonnage rating

# Wild Dog 4x4® Tree Trunk Protector

## Tree Trunk Protectors

<u>Stock Code</u>	<u>Min. Breaking Load</u>	<u>Width (mm)</u>	<u>Length (m)</u>	<u>Retail Price</u>
WDTT012003*	10,000kg	90	3	<b>R450.00</b>
WDTT012005*	10,000kg	90	5	<b>R600.00</b>

\*Stocked item – Lead times apply to all others

Wild Dog 4x4® tree trunk protectors are manufactured from Polyester webbing. Polyester has low stretch and is both lightweight and durable. The Wild Dog 4x4® tree trunk protector has a 10,000kg breaking load and is designed to be slung around a tree for use as an instant anchor point.

The 90mm wide webbing is kind to the tree and prevents the possibility of ring barking, which is common when wire rope or chain is used.

## Wild Dog 4x4® Snatch Strap

Wild Dog 4x4® Snatch Straps are manufactured from 100% Nylon webbing. Nylon has a very high stretch (Can be in excess of 20% at the breaking load) and as such is an excellent material for the snatching recovery of a vehicle.

60mm x 8,000 kg (WDKS008009) are Standard stock snatch strap, other snatch straps listed below may require a lead time of up to 2 week from receipt of order.

<u>Stock Code</u>	<u>Min. Breaking Load</u>	<u>Recommended Vehicle weight</u>	<u>Width (mm)</u>	<u>Length (m)</u>	<u>Retail Price</u>
WDKS008010*	8,000kg	2000kg	60	9	<b>R799.00</b>
WDKS012010*	12,000kg	3000kg	80	9	<b>R1200.00</b>

\*Stocked item – Lead times apply to all others

Also comes in a Kit form. See pg. 10

All prices quoted do not include freight or fitting. Prices quoted are subject to change without notice  
Some pictures of products may vary.

# Wild Dog 4x4® Kinetic Recovery Rope

## KINETIC RECOVERY ROPE

*with 260mm soft eye on each end.  
with ripstop protective sleeve.*

### FEATURES:

- Allows for an even pull during recoveries
- Stretches up to 35%
- Reduced stress to vehicle components compared to static tow straps
- Professionally Manufactured and hand spliced in the RSA

### Even Pull

Rigging a kinetic recovery rope in this manner reduces stress to the individual recovery points on the vehicle and lessens the chance of tweaking the frame during difficult extractions.

### Kinetic

The Wild Dog 4x4® kinetic recovery rope is the ultimate recovery rope. During vehicle extraction, the kinetic rope stretches and absorbs enormous energy from the pulling vehicle. This energy is then transferred to the stuck vehicle, resulting in an extremely effective and efficient vehicle recovery.

Stretch characteristics will reduce relative to the amount of use and can lose 10% of its tensile strength when wet.

### Shock absorbing

Under max load, a kinetic recovery rope will stretch up to 35%. This stretch helps relieve the jerking action commonly felt during vehicle recovery, effectively reducing the amount of stress put through a vehicle and its occupants.

### Strong

Professionally hand-spliced in the RSA, the kinetic recovery rope is comprised of an Fibre Dyed Orange Nylon to provide maximum strength and protection from the elements.

### Protective Sleeve

The kinetic rope can also be ordered with a protective sleeving to protect your recovery rope and prolong the lifetime of the kinetic rope.

<u>Stock Code</u>	<u>Min. Breaking Load</u>	<u>Recommended Vehicle weight</u>	<u>Length (m)</u>	<u>Retail Price Excluding Sleeve</u>	<u>Stock Code</u>	<u>Retail Price Including Sleeve</u>

Some pictures of products may vary.

# Wild Dog 4x4® Winch Extension Straps

## Winch extension straps

Wild Dog 4x4® winch extension straps are manufactured from 100% Polyester webbing. Polyester has low stretch and is both lightweight and durable. The wild dog 4x4 winch extension straps has a 5,000kg breaking load and is designed to extend the length of your winch wire rope enabling greater flexibility and increased options for vehicle recovery. These Straps also comes with a protective sleeve to extend the life of the strap.

Wild Dog 4x4® winch extensions straps have reinforced eyes.

WDWE010004 (10m Long) is standard stock. The 20m listed below may require a lead time of 1 - 2 week from receipt of order.

Stock Code	Min. Breaking Load	Width (mm)	Length (m)	Retail Price
WDWE010004	5,000kg	50	10	<b>R800.00</b>
WDWE020004	5,000kg	50	20	<b>R1300.00</b>
WDWE010008	8,000kg	51	10	<b>R1100.00</b>
WDWE020008	8,000kg	51	20	<b>R1750.00</b>

Also comes in a Kit form. See pg. 10

## Wild Dog 4x4® Snatch Block

### Stock Code:

WDSB008001 **R650.00**

Wild Dog 4x4® Snatch Block is an essential accessory for any off roader. Off road blocks are designed to be used with any winch or vehicle mounted power winch.

The use of a snatch block allows the capacity of a winch to be doubled by utilising two parts of the line instead of one. It is also essential for deflecting the winch rope when winching around corners or at difficult angles.

8,000kg capacity snatch block with 105mm diameter sheave with bush and grease nipple. Suits up to 12mm diameter wire rope or synthetic rope.

See New design Snatch Block on pg 18

All prices quoted do not include freight or fitting. Prices quoted are subject to change without notice  
Some pictures of products may vary.

# Wild Dog 4x4® Winch Extension Rope

## Synthetic Winch Line extension

### Lightweight.

Wild Dog 4x4® synthetic winch line is 80% lighter than wire cable.

### Safe.

In the event of breakage, Wild Dog 4x4® synthetic winch line won't snap back or whiplash like wire cable. Wild Dog 4x4® synthetic winch line will not splinter and tear up your hands.

### Strong.

Wild Dog 4x4® synthetic winch line have a higher breaking strength than wire cable giving you that added peace of mind when dependability is critical.

### Float.

Wild Dog 4x4® Synthetic Winch Line floats in water, an added benefit for visibility and safety.

### Convenient.

Wild Dog 4x4® Synthetic Winch Lines are torque free and will not kink like wire cable.

### Winch line ends.

Wild Dog 4x4® Synthetic Winch Line Extensions comes complete with Stainless steel thimble or 200mm Protected Soft eyes Hooks on the end.

# Wild Dog 4x4® Soft Shackle

<u>Stock Code</u>	<u>Length open (mm)</u>	<u>Inner Length Closed (mm)</u>	<u>WLL /SWL (Tonnes)</u>	<u>Break Load (Tonnes)</u>	<u>Retail Price</u>
WDSE008008	590	200	2.0	8	<b>R250</b>
WDSE010010	600	230	2.5	10	<b>R325</b>
WDSE012014	680	250	3.5	14	<b>R425</b>
WDSE014020	700	300	5.0	20	<b>R750</b>

## Advantages Over Steel Shackles:

Almost twice as strong as cable for the same diameter.  
It floats - no more losing shackles in the water or muck!  
Flexible - easily wraps around the most difficult pulling points!  
One piece construction - no pins to fasten!

## Uses:

Off-Road Recovery  
Marine  
Farming  
Industrial  
Mining

## How To Use:

Open shackle by loosening and slipping off loop over knot  
Thread through eye of Kinetic Rope or strap and through tow point Loop eye back over knot and pull to tighten  
Check your vehicle's owner's manual for proper attachment points  
Do Not attach to bumper, trailer hitch ball or sharp edged tow point  
Loop eye back over knot and pull to tighten  
Pull as normal. Wild Dog 4x4® shackles are designed to take the load without stretching.

## CARE & MAINTENANCE

The soft eye shackle can be washed off with water and air dried. While synthetic fibres are stronger than steel they are susceptible to wear and cutting. Always inspect shackle before use for excess wear, cutting, or worn and frayed areas.

All prices quoted do not include freight or fitting. Prices quoted are subject to change without notice  
Some pictures of products may vary.

# Wild Dog 4x4® Chafe Guard

Compatibility: Wild Dog 4x4® Synthetic winch Line  
Wild Dog 4x4® Kinetic Recovery Rope  
Wild Dog 4x4® Heavy Duty Recovery Strops

Diameter: 25mm  
50mm

Length: 1000mm (Custom Lengths available on request)

Closure Type: Velcro

Color: Black

Material: Ripstop canvas

- Protects Your Synthetic winch Line and Kinetic Recovery Rope From Coming In Direct Contact With Hard Or Abrasive Surfaces During Your Recovery Process
- Each Chafe Guard Is Custom Made To Snuggly Fit Around Your Recovery Rope No Matter Which Diameter You Are Using
- Prolongs The Life Of recovery rope.

**WDCG000101 R175**

## Wild Dog 4x4® 2" Recovery/Tow Hitch with Bow Shackle

Will fit any 2" receiver.  
4.75T Bow Shackle Included.  
Aluminium finish.

### **XLarge**

- Aircraft grade 6082-T6 aluminium
- Rated at 3750kg 4:1 safety ratio
- Weight: 1.2kg
- Dimensions: 210mm x 50.8mm x 50.8mm
- Ultimate Failure 15,500kg

**WDRH000003 R950**

All prices quoted do not include freight or fitting. Prices quoted are subject to change without notice  
Some pictures of products may vary.

# Wild Dog 4x4® Custom Hawse Fairlead

This Wild Dog 4x4® hawse fairlead is milled from a single piece of high grade aluminium. It is essential that you use a hawse fairlead with synthetic ropes as using roller fairleads can result in damage being caused to the synthetic rope by it becoming trapped in the fairleads rollers.

WDHF000001 R700

# Wild Dog 4x4® Safety Link - XLarge

Wild Dog 4x4® introduces the new Safety Link shackle / Soft Shackle mount for synthetic ropes. Engineered and machined in the RSA from lightweight billet 6082-T6 aluminium

The Safety Link is compatible with both Hawse and Roller fairleads and snugs neatly against both versions.

- Aircraft grade 6082-T6 aluminium
- Rated at 3500kg 4:1 safety ratio
- Weight: 850 grams
- Dimensions: 120mm x 75mm x 63mm
- machined 16mm steel pin
- Ultimate Failure 14,000kg

**WDSL000005 R1300 Standard**

*Suited for up to 12mm Synthetic Winch Rope.*

# Wild Dog 4x4® Safety Damper

Dampener will absorb rope energy if rope failure occurs when pulling a heavy load. Heavy-duty material with neon orange tape for visibility features storage pockets for shackles, pulley blocks, or straps.

The safety damper is a recovery safety device that has been designed to reduce the whipping action of a winch rope/cable/strap in the event of failure and diminishes the possibility of vehicle damage and/or personal injury.

The safety damper should be placed in the middle of the winch rope, cable or strap. To install, simply pull apart the Velcro, drape the damper over the rope/cable/strap and compress the Velcro back together. Add dirt, sand in inside dampener pockets for added weight.

Safety dampers are now mandatory for most off-road competition events; winch like the pros!

**WDWD000002 R375**

All prices quoted do not include freight or fitting. Prices quoted are subject to change without notice

# Wild Dog 4x4® DOG HOOK

The Wild Dog 4x4® DOG HOOK is a recovery hook that is capable of mounting on a clevis or shackle bumper tabs. The Wild Dog 4x4® DOG HOOK has 3 mounting options. It can be used on clevis tabs, winch fairleads and rear hitches.

- Aircraft grade 6082-T6 aluminium
- Rated at 4750kg 4:1 safety ratio
- Weight: 1.2kg
- Dimensions: 180mm x 75mm
- Fits all standard 24mm bumper tabs
- machined 22mm Stainless steel pin
- 30mm aluminium safety latch for extra protection against slip off
- Ultimate Failure 19,000kg

**WDDH000001 R3200 each**

All prices quoted do not include freight or fitting. Prices quoted are subject to change without notice. Some pictures of products may vary.

# Wild Dog 4x4® DOG SHACKLE I

The Wild Dog 4x4® **DOG SHACKLE I** is a recovery hook that is capable of mounting on a clevis or shackle bumper tabs. The Wild Dog 4x4® DOG SHACKLE I has 3 mounting options. It can be used on clevis tabs, winch fairleads and rear hitches.

- Aircraft grade 6082-T6 aluminium
- Rated at 3000kg 4:1 safety ratio
- Weight: 0.2kg
- Dimensions: 125mm x 105mm
- Fits all standard 20mm bumper tabs
- Machined 17mm stainless steel pin
- Ultimate Failure 12,000kg

**WDDS100001 R2500 per set – Silver**
